Liviu Oloi

QA Specialist
Timiş, Romania

Summary

Passionate about technology and hardworking, I pursue my professional goals without letting go of my dreams. Root-cause-analysis is the way I find new, more efficient ways to improve activities and support people I work with. Challenges motivate me and I like to be always in the pursuit of development.

Experience

Retviews
QA Analyst
September 2025 - Present (4 months)

Working in a Quality Assurance role validating scraped product data by comparing internal platform information with live website content. Performing manual quality checks to ensure accuracy, consistency, and data integrity, identifying and reporting discrepancies between systems and source websites. Collaborating with internal teams to maintain high data quality standards.

Toluna Corporate
6 years 9 months

QA Specialist
November 2019 - April 2025 (5 years 6 months)
Timis County, Romania

Assisting the in-region Digital Service Managers with the new incoming clients' portal requests, and/or migration of clients from different platforms, ensuring QA standards are met.

Performs QA for each panel, e.g. tests set up and overall functionality of community website; checks recruitment data for accuracy post launch;

Assist with platform migrations ensuring data and functionality have successfully migrated from one platform to another;

Design and distribution of test plans based upon release schedules established by development and product owners;

Manually test, track and manage the resolution – be responsible of getting resolution of critical defects and issues identified;

Documents and report defects and issues and ensure the proper visuals and steps to recreate are documented;

Document QA procedure for all projects;

Identifying areas of weakness to existing procedures, continually implement new procedures, and assess risk of impact from changes to projects

Assist in analyzing, documenting and communicating results

Ensure adherence to testing best practices and DB testing standards

Digital Services Analyst
August 2018 - November 2019 (1 year 4 months)
Timis County, Romania

Responsible for all aspects of administering incentives for sweepstakes and points programs;
Performs QA for each panel, e.g. tests set up and overall functionality of community website; checks recruitment data for accuracy post launch;
Responsible for uploading of initial panel content and the creation of panel variables beyond profiling questionnaire (e.g. append client data);
Assists with maintaining the panel: prepares panel health reports for manager's review;
Coordinate engagement content for community portal updates (e.g. quick poll, blog article, discussion topic);
Supports all database work, including migration of panel data;
Ensures undeliverable emails are inactivated according to panel rules;
Panel management, marketing research operations, or project management experience a definite asset
